Karl Louise Rito

Web Developer @ SVEN | Laravel | Vue.js | Agile
Binãñ, Calabarzon, Philippines

Summary

As a Web Developer at SVEN - The Digital 1st Agency, I specialize in full-stack web development, designing, building, and maintaining scalable, secure, and high-performance web applications that meet diverse client requirements. SVEN is a leading digital-first advertising agency in the Philippines, known for its innovative, youth-driven approach to brand strategy, digital content, and development. Working remotely from Quezon City, I actively participate in project planning, API integration, system design, and troubleshooting to deliver solutions aligned with industry best practices.

Previously, I served as a Full-stack Developer and Junior Web Developer, where I honed my skills in PHP, Laravel, Vue.js, REST APIs, and database management, gaining a strong foundation in modern web technologies and agile development workflows. Additionally, I worked as an AI Trainer at Outlier, contributing to the fine-tuning of AI models that enhance developer tools, code quality, and software development efficiency.

I am also a scholar at Trimex Colleges, balancing my studies in Information Technology with professional work, demonstrating discipline, strong time management, and commitment to continuous learning. My academic knowledge includes Artificial Intelligence, Machine Learning, and Data Analysis, which support my passion for innovative and technology-driven solutions.

Experience

SVEN - The Digital 1st Agency
Web Developer
September 2025 - Present (2 months)
Quezon City, National Capital Region, Philippines

-Focus on full-stack web development, delivering scalable applications tailored to diverse client requirements.

- Responsibilities include API integration, system architecture, and ensuring high-performance web solutions.

- Actively participate in project planning and collaborate with team members to troubleshoot technical issues.

- Maintain a strong commitment to continuous learning in emerging technologies, adapting to evolving project demands.

Switch Connect

3 years 7 months

Full-stack Developer

September 2023 - October 2025 (2 years 2 months)

Laguna, Calabarzon, Philippines

- Acted as core developer for key clients including Honda, driving critical web application development and delivering high-quality solutions using Laravel, Vue.js, GraphQL, and MySQL.

- Handled mentoring and technical guidance for junior developers, fostering skill growth and adherence to best practices in full-stack development.

- Managed tasks and workflows efficiently using Jira, contributing to clear project tracking and communication within Agile and Scrum environments.

Junior Web Developer

April 2022 - September 2023 (1 year 6 months)

Laguna, Calabarzon, Philippines

- Developed and contributed to the coche.ph web application, a key project that played a significant role in acquiring and supporting the Honda client account.

- Collaborated with senior developers to build responsive, user-friendly frontend features using Vue.js and assisted in backend development with Laravel and MySQL.

- Participated in Agile development cycles, including sprint planning and daily stand-ups, to ensure timely delivery and quality outcomes.

- Gained valuable experience in full-stack development while supporting ongoing maintenance and feature enhancements for client web applications.

Outlier

AI Trainer for Developers

October 2024 - January 2025 (4 months)

Remote

Trained and fine-tuned AI models specifically designed for developer assistance and code generation. Collaborated with cross-functional teams to improve AI model performance in understanding coding patterns, debugging processes, and software development best practices. Contributed to the development of AI-powered tools that enhance developer productivity and code quality.

Side Hustle

Frontend Developer

June 2021 - July 2021 (2 months)

Ibadan, Oyo, Nigeria

This is a 4 weeks internship base on Nigeria, I joined the cohort as a frontend developer where I met people with the same interest, as well as experience how to connect with other people and share ideas to accomplish our tasks easily.

Education

Trimex Colleges

Information Technology, Computer Programming · (June 2020 - June 2024)

Biñan Integrated National High School

Senior High School Diploma, Science, Technology, Engineering, and Mathematics · (June 2018 - April 2020)
